

BRINK'S LAUNCHES U.S. SUPPLIER DIVERSITY PROGRAM

Brink's is committed to developing a diverse supplier base that ensures that women, veteran, minority-owned and small businesses can participate in driving value creation for Brink's. Our approach ensures that qualified businesses are included in the vendor evaluation and selection process.

Studies show that companies with a diverse supplier base realize a greater return on investment as a result of strong collaboration, innovation and competition.

As the industry leader, we are making this part of how we do business at Brink's because we want our company to reflect the diversity of our customers and our communities across our global network. And we believe that a diverse supplier base will help us compete and win for our communities, employees and customers.
